EQUITY MARKET SUMMARY

Where the first trading day of the year was sparked with liquidity, the second day was near clear of activity with a little under 39,000 shares trading on the BSE domestic board. Activity was driven majorly by BTCL crossing 24,000 shares valued at P19,500. The share price was docked a thebe as a consequence of the trades, ending the trading session valued at P0.81/share, or 12% lower than its year opening price. The stock is the second price mover of the year, and countered the previous day's gain, in respect of the Domestic Indices (the DCI and DCTRI). Both the indices pulled back 0.03% in the day, reducing both their gains for the year so far, which currently stand at 0.15%. In company news, Lucara announced that their Karowe Mining License has been renewed, effective January 4, 2021 for a period of 25 years, securing Lucara's mining rights to 2046. Meanwhile, a few more of the listed companies continue to publish closed period announcements as they note the beginning of preparations of their financial results. These are companies that have December year ends and those with June year ends.

Comment

The pound may be in rough ride in the next few weeks, as stringent lockdown measures weigh down on the optimism from the last minute Brexit deal with the European Union. The unit paused following a rally that took it to May 2018 highs, as a result of investors unwinding their short-term hedge positions. The British Prime Minister imposed a national lockdown on Monday, in an attempt to curb the spread of the new COVID-19 variant. This resulted in the upside for the unit hesitating amid the ride.

Comment					

Oil prices climbed for another day on Tuesday, as geopolitical tensions increased following the seizure by Iran of a South Korean ship. This was following a 1% decline on Monday, coming as a result of the Organization of the Petroleum Exporting Countries (OPEC) and its allies, collectively known as OPEC+, were unable to come to an agreement on output changes for February. The issue of refreshed lockdowns on a number of nations, being at the forefront, as they are likely to restrict demand for oil and oil products, like fuel.
